GitHub:<https://github.com/Prabha278>

Objective:

Motivated Electrical and Electronics Engineering student with knowledge of electronic circuits, microcontrollers, embedded systems, and hardware fundamentals. Seeking a Hardware Engineer Trainee position to apply technical skills, gain industry experience, and contribute to hardware design, testing, debugging, and embedded system development while continuously learning and growing as an engineer.

Education:

BE Electrical and Electronics Engineering 2023-2027

Kumaraguru College of Technology – 7.61 CGPA

Government Girls Higher Secondary School - Percentage

88.6

Year : 2023

Soft Skills:

Good listening
Adaptability
Leadership
Time Management
Team Work

Technical Skills:

C Programming
Python(basic)
Embedded C (Basic)
PCB(Proteus , Kicad)
8051 Microcontroller(basic)
UART, SPI, I2C (Basic Understanding)
Analog & Digital Electronics(basic)

Project

1.Smart Water irrigation system

Designed and implemented a Smart Water Irrigation System using an 8051 microcontroller, where soil moisture sensors monitor soil condition and automatically control a water pump through a relay. The system improves water efficiency and supports sustainable irrigation.

2. Real-Time Weather Monitoring and Alert System using IoT

Built a beginner-level IoT project using ESP32 and sensors to monitor temperature and humidity in real time. The system displays sensor readings and sends the data over Wi-Fi for remote monitoring. It also provides an alert when the measured values exceed predefined limits. This project helped me gain basic knowledge of IoT, sensor interfacing, embedded programming, and wireless communication.

Certification:

- 1.Energy Meterials and devices - NPTEL
- 2.Solar Power Sensors - Coursera

Workshops / Technical Events:

- 1.Redefine event (Explore '26)-KCT
- 2.Industry Connect Hackathon (AICTE Idea LAB) - KCT

Internship / Research

NLC India Limited – Student Trainee

Gained practical exposure to industrial electrical systems and power generation processes, enhancing technical and real-world engineering knowledge.

Code Bind Technologies

Completed an IoT internship at Code Bind Technologies, where I gained basic knowledge of IoT concepts, ESP32/Arduino programming, sensor interfacing, and real-time monitoring.
